

Is this the right PATH toward our energy future?

American Electric Power and Allegheny Energy want to build a 765 kV transmission line called PATH (Potomac – Appalachian Transmission Highline) through West Virginia that will look a lot like these photos.

Find out more about PATH

WHERE: Kresge Hall in the basement of the Martin Religious Center at WV Wesleyan in Buckhannon, WV

WHEN: May 8, 2009. Dessert, coffee, displays and conversation start at 6:30 PM. Program starts at 7:00 PM

WHAT: Speakers, maps, & displays will provide information and answer questions on possible routes, opponents and proponents, legal factors, health concerns, and the opportunities for citizen participation.

DONATIONS: Small donations to defray expenses would be appreciated but cookies to share with the group would be appreciated, too.

For info: Contact Karen at karen.grubb@fairmontstate.edu or 304-657-0812;
